Mayank Bisht

Motivated Class 12 Science student aspiring for engineering, adept in AI, robotics, and hackathons, skilled in software-hardware integration and version control.

Education

Science Stream with AI
Vivekanand Inter College
Class 12

Secondary Education
Class 10 Board
GPA:94/100%
with science stream

Experience

15 months work experience in
ATL Ai Labs (1/04/2025 to 28/06/2026

Software Engineering Intern
Artificial intelligence
Uplyx Solutions intern
April to June 2026

National Representative

1.Artpark RoboArena at
IISC BANGALORE
2.Gyanversa hackathon in NEW DELHI
3.viswanova national level hackathon
in MIT WORLD PUNE

International representative

International level USAII hackathon qualifier secure #23 rank out of 25,000 teams or +85 international countries

Professional Development

AI and Robotics Workshop
(IISC bangalore)

International and National level Hackathon Participation

Proficient in Programming Languages

Achieved 1st position in State Level Hackathon 2.0

Skills

Programming Skills

Developed Python and C++ projects for AI applications.
Utilized GitHub for collaborative software development projects.
Created innovative projects in JavaScript for IoT solutions.

Technical Expertise

Integrated software with hardware for automation projects.
Developed machine learning models using TensorFlow and Python.
Built prototypes demonstrating AI applications in robotics.

Academic Strengths

Excelled in Physics, Mathematics, and Computer Science courses.
Conducted research projects on electrostatics and machine learning.
Participated in inter-school science exhibitions and competitions.

Fluent in English and Hindi
